DETAILED ACTION

This office action is issued pursuant to a telephone call conducted with Atty. Malandra who asked that this Species Requirement be mailed. The Species Requirement issued on 10/08/04 is superceded by this action because the preliminary amendment of 8/20/02 had not been in the file at the time of the 10/8/04 and was not considered then. In an attempt to avoid issuing another action, the examiner called the applicant corporation to conduct a telephonic election, but was asked by counsel to issue a written election which occurs below.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

species of claims 2-5, 25-28 drawn to seller transmitting log of sales; species of claims 8-15, 31,32,33,36-38 drawn to fraud detection; species of claims 17-22, 35 drawn to transmitting to a taxing jurisdiction log of sales.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1,6,7,16,29,30,34, and 39 are generic. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to PRIMARY EXAMINER Joseph A. Fischetti at telephone number (703) 305-0731.
